SUMMARY

- **Computer Science** student with a Data Science emphasis, Statistics and Mathematics minors, and a 3.99 GPA, focused on applied data science, public datasets, and interactive analytical tools.
- **Data Science:** Built projects using Python, R, SQL, feature engineering, exploratory modeling, and web-based visualization.
- **Tangible Results:** Developed deployed tools and research-oriented projects for applied problems including demographic visualization, psychometric analysis, and DNS privacy research.
- **Technical Communication:** Present implementation details, methods, findings, and limitations through documentation, reports, and interactive interfaces.

EDUCATION

Brigham Young University | B.S. in Computer Science (Data Science Emphasis) | **December 2027**

- **Minors:** Statistics and Mathematics
- **GPA:** 3.99, Honors Program, ACM

Weber State University | A.A.S. in Computer Science | **April 2022**

- **GPA:** 4.00, Phi Kappa Phi

SKILLS

- **Languages & Frameworks:** Python (scikit-learn, PyTorch), R (Quarto), C#, Swift, TypeScript, Node.js, React
- **Data & Analysis:** SQL (PostgreSQL, MySQL), Pandas, NumPy, Matplotlib/Seaborn, geospatial visualization
- **Infrastructure & Cloud:** Microsoft Azure, ServiceNow, Cloudflare DNS, DigitalOcean, Docker, Linux, Git/GitHub

SELECTED PROJECTS

Census Visualizer

- Developed a Python/SQL data pipeline for demographic metrics across 400,000+ Census geographies using American Community Survey data.
- Built a full-stack geospatial website using MapLibre, PMTiles, and derived Census metrics to present demographic patterns through interactive map visualization.

IPIP Workbench

- Built an interactive personality-inventory tool using public-domain IPIP instruments and browser-based quiz scoring.
- Used psychometric methods including exploratory factor analysis, principal component analysis, and reliability analysis to evaluate scale structure and interpretation limits.

Spotify Playlist Track Predictor

- Analyzed audio features from nearly 5 million Spotify tracks and built a playlist prediction/extension model using a recurrent neural network.
- Documented methodology, results, and limitations in a project report.

NBA Predictive Modeling

- Collaborated on a machine learning project to predict NBA game outcomes using models including XGBoost and decision trees.
- Evaluated model performance and documented predictive limitations in a team report.

EXPERIENCE

Church Technical Service Missionary | Church of Jesus Christ of Latter-day Saints | **July 2024 – Present**

- Led a team of missionaries to streamline surplus workflows, improving data reporting for 3,000+ devices per year.
- Collaborated with a team to migrate a legacy Visual Basic codebase to C# in supporting department machine translation workflows.
- Deployed and managed Windows and macOS systems in an enterprise environment using ServiceNow, Microsoft Azure, and internal tools.

Research Assistant | Internet Measurement and Anti-Abuse Laboratory (BYU) | **May 2023 – January 2024**

- Assisted Dr. Casey Deccio with data wrangling and exploratory analysis of DNS/network logs for a DNS privacy study involving encrypted DNS protocols.

Desktop Support Technician | College of Family, Home, and Social Sciences (BYU) | **March 2023 – April 2024**

- Handled technical support queries for faculty and staff, including software issues and troubleshooting hardware.
- Set up and maintained Windows and macOS devices for the college's administrative and academic use.

Cybersecurity Camp Lead | School of Information Technology (BYU) | **October 2022 – May 2023**

- Organized and designed challenges for Capture the Flag (CTF) competitions for K–12 students across Utah, including the 2023 BYU Cybersecurity Camp.

Computer Science Tutor | Weber State University | **August 2021 – April 2022**

- Provided guidance and feedback to undergraduate computer science students in programming, algorithms, and foundational concepts.
