EDUCATION

Brigham Young University | B.S. in Computer Science with Data Science Emphasis (**GPA: 3.99**) **December 2027**

- Honors Program; Statistics and Mathematics minors

Weber State University | A.A.S. in Computer Science (**GPA: 4.00**)

April 2022

SKILLS

- **Languages & Frameworks:** Python (scikit-learn, PyTorch), R, C#, TypeScript, Node.js, React, Playwright
- **Data & Analysis:** SQL (PostgreSQL, MySQL, SQLite), Pandas, NumPy, Matplotlib, Seaborn, MapLibre, Power BI
- **Infrastructure & Cloud:** Microsoft Azure, ServiceNow, Cloudflare DNS, DigitalOcean, Docker, Linux, Git/GitHub

EXPERIENCE

QA Engineer | BYU Office of Information Technology

August 2026 – Present

- Developing automated unit and end-to-end tests using Playwright and pytest for business automations in Project RYZE, with testing responsibility across a planned scope of ~100 automations.

Church Technical Service Missionary | The Church of Jesus Christ of Latter-day Saints

July 2024 – July 2026

- Ported and refactored an ~9,000-line Visual Basic codebase to C# for Missionary Department translation workflows, improving robustness and validating output equivalence with MD5 hashes.
- Deployed and managed hundreds of Windows and macOS systems in an enterprise environment using Microsoft Azure and ServiceNow.
- Helped lead secure wiping and surplus processing for 3,000+ devices over 16 months.

Research Assistant | Internet Measurement and Anti-Abuse Laboratory (BYU)

May 2023 – January 2024

- Analyzed ~1M lines of DNS/network logs using Python to investigate DoH/DoT adoption across DNS resolver implementations including BIND9 and Unbound.

Desktop Support Technician | College of Family, Home, and Social Sciences (BYU)

March 2023 – April 2024

- Provided on-site Windows/macOS hardware and software support for BYU faculty and staff.

Cybersecurity Camp Lead | School of Information Technology (BYU)

October 2022 – May 2023

- Organized and designed challenges for Capture the Flag (CTF) competitions for K–12 students across Utah.

SELECTED PROJECTS

Census Visualizer

- Developed a Python/PostgreSQL pipeline for 400,000+ ACS geographies, deriving demographic metrics and 90% uncertainty estimates using variance-replicate data and Monte Carlo simulation.

Utah Home Values Explorer

- Integrated five public data sources in a Python pipeline to normalize 600,000+ Utah home values using assessment-to-sales ratios and home-price indexes, highlighting affordability via ACS household income.

IPIP Workbench

- Created an R workbench and React website for five psychometric instruments, evaluating scale structure with exploratory factor and reliability analysis and generating percentile and standard scores.

Spotify Playlist Track Predictor

- Trained and tuned an LSTM model to predict next-track audio features from 10-song sequences and match predictions against a 4.7M-track catalog.
