SUMMARY

Computer Science student with a **Data Science** emphasis, Statistics and Mathematics minors, and a 3.99 GPA. Develops **applied analytical tools** using public datasets, statistical methods, and interactive visualization.

EDUCATION

Brigham Young University | B.S. in Computer Science with Data Science Emphasis (**GPA: 3.99**) **December 2027**

- Honors Program; Statistics and Mathematics minors

Weber State University | A.A.S. in Computer Science (**GPA: 4.00**) **April 2022**

SKILLS

- **Languages & Frameworks:** Python (scikit-learn, PyTorch), R (Quarto), C#, Swift, TypeScript, Node.js, React
- **Data & Analysis:** SQL (PostgreSQL, MySQL), Pandas, NumPy, Matplotlib/Seaborn, GIS/Maplibre
- **Infrastructure & Cloud:** Microsoft Azure, ServiceNow, Cloudflare DNS, DigitalOcean, Docker, Linux, Git/GitHub

EXPERIENCE

Church Technical Service Missionary | The Church of Jesus Christ of Latter-day Saints **July 2024 – July 2026**

- Led a team of missionaries to streamline surplus workflows, improving data reporting for 3,000 devices per year.
- Collaborated with a team to migrate legacy Visual Basic tools to C# for machine-translation workflows.
- Deployed and managed Windows/macOS systems in an enterprise environment using Azure and ServiceNow.

Research Assistant | Internet Measurement and Anti-Abuse Laboratory (BYU) **May 2023 – January 2024**

- Wrangled and analyzed DNS/network logs for a study involving user privacy of encrypted DNS protocols.

Desktop Support Technician | College of Family, Home, and Social Sciences (BYU) **March 2023 – April 2024**

- Resolved hardware and software support requests from faculty and staff.
- Set up and maintained Windows and macOS devices for the college's administrative and academic use.

Cybersecurity Camp Lead | School of Information Technology (BYU) **October 2022 – May 2023**

- Organized and designed challenges for Capture the Flag (CTF) competitions for K–12 students across Utah.

SELECTED PROJECTS

Census Visualizer

- Built a Python/SQL pipeline for 400,000+ Census geographies and an interactive demographic mapping site using MapLibre and PMTiles.

Utah Home Values Explorer

- Developed a data pipeline integrating and cleaning five data sources to analyze 600,000+ Utah home values and geographic affordability constraints.

IPIP Workbench

- Built a browser-based IPIP personality inventory and assessed scale structure and interpretation limits using exploratory factor analysis, principal component analysis, and reliability analysis.

Spotify Playlist Track Predictor

- Analyzed nearly 5 million Spotify tracks and trained a RNN for playlist prediction and extension.
